Presentado como una completa síntesis de las culturas que pueblan el continente, esta historia de África no omite las relaciones entre los condicionamientos naturales, el desarrollo social y la influencia de las distintas metrópolis. A través del relato de las vicisitudes de sus pobladores, el autor muestra cómo los africanos fueron unos adelantados en la lucha contra las enfermedades y la naturaleza, para establecer, asimismo, la relación entre las distintas épocas históricas y el momento de convulsión que sufren hoy los diversos Estados.
