Fujifilm Corporation has been a longstanding camera manufacturer for many years. Their latest line of cameras includes the X-mount series that was first introduced in early 2016. This was a good camera that met the needs of expert users and the amateur user who was just learning the industry. It is more modern with a mirror less feature that complements many of the other improved areas. The camera comes equipped with an optical hybrid OLED viewfinder that will give a resolution of 2.36M dot resolution. There are other things on the device such as an autofocus assist lamp, 3-inch articulated LCD, external flash, self-timer, continuous drive capabilities up to 8 frames per second and a stereo microphone and a built in wireless connectivity.
