In a modern world where we have instant access to guitar tablature, YouTube videos, slowdown software, lesson apps and midi, what is the value in learning to fluently read music on guitar?

Sight reading music is an essential part of being able to communicate with other musicians in their own language. *Professional musicians communicate with written music*, and because very few other instruments use tablature, musicians

simply learn to read music as a natural part of learning to play.

If you want to have a better chance of working professionally as a guitarist you must learn to sight read on your instrument.

The melodic exercises *gradually increase in complexity* as you progress through the page and are designed to be almost impossible to memorise. This leaves the student with an inexhaustible

resource for life.

There are *dedicated chapters* on how to practice, and scale theory. There are *many diagrams* detailing the best way to find and play written pitches on your guitar and of course an in depth study of *how to recognise pitches* and rhythms on the written stave.
