Unlock your mind

From the bestselling authors of Thinking, Fast and Slow; The Black Swan; and Stumbling on Happiness comes a cutting-edge exploration of the mysteries of rational thought, decision-making, intuition, morality, willpower, problem-solving, prediction, forecasting, unconscious behavior, and beyond. Edited by John Brockman, publisher of Edge.org ("The world's smartest website"—The Guardian), Thinking presents original ideas by today's leading psychologists, neuroscientists, and philosophers who are radically expanding our understanding of human thought.

Daniel Kahneman on the power (and pitfalls) of human intuition and "unconscious" thinking • Daniel Gilbert on desire, prediction, and why getting what we want doesn't always make us happy • Nassim Nicholas Taleb on the limitations of statistics in guiding decision-making • Vilayanur Ramachandran on the scientific underpinnings of human nature • Simon Baron-Cohen on the startling effects of testosterone on the brain • Daniel C. Dennett on decoding the architecture of the "normal" human mind • Sarah-Jayne Blakemore on mental disorders and the crucial developmental phase of adolescence • Jonathan Haidt, Sam Harris, and Roy Baumeister on the science of morality, ethics, and the emerging synthesis of evolutionary and biological thinking • Gerd Gigerenzer on rationality and what informs our choices
